

Technical drawing of a vertical mechanism. The drawing shows a central vertical shaft with a horizontal arm extending from it. The arm is labeled with a diameter of $\Phi 38$. The arm is shown in two positions: a solid line position and a dashed line position. The angle between the two positions is 65° . The arm is also shown at an angle of 25° to the vertical. The mechanism is mounted on a base with two vertical supports. The drawing is a technical sketch showing the geometry and dimensions of the mechanism.
